

# EVERYDAY HEALTH™

*May 2, 2019*

It's easy to play down early signs as "another crampy period!" Then, you are allowing the condition to get a lot worse. So, if you have any kind of family history of endometriosis, even if it's not clearly documented, or, if your pains are getting gradually worse, go see a gynecologist and explain yourself!

Juergen Eisermann, MD
